PRESS RELEASE

September 16, 2004

Today, The Network Address, Inc. d/b/a/ NA Ware, a Maryland-based manufacturer of high technology mobile computing stations, announced its relocation of corporate and manufacturing operations to Marble Falls, Texas. The company intends to own and occupy an approximate 10,000 square foot manufacturing and office location in the Gateway Business Park in Marble Falls at 700 Gateway Parkway.

The company plans to create up to twenty new jobs in Marble Falls in manufacturing and assembly operations, and in administrative and corporate positions. Several key associates and officers for NA Ware will relocate to the Marble Falls/Lake LBJ Area. Relocation is expected to be completed by year-end.

William E. Boisvert, President and Chief Executive Officer for NA Ware cited several reasons for the relocation. Boisvert stated, "Central Texas was the primary search area for a new location that would reduce business costs, lower taxes and centralize distribution to customers in all areas of the United States as the company expanded capacity in response to strong growth demands. Marble Falls met these requirements and had an existing building that fit our needs. The business friendly atmosphere of the City of Marble Falls and the financial support from the Marble Falls Economic Development Corporation to help off-set relocation costs were also prime factors for the relocation. We looked at several Central Texas locations and Marble Falls was the right choice."

NA Ware "Mobile Computing Anywhere" is one of the leading manufacturers of wireless mobile computing stations used in major hospital healthcare facilities including, intensive care units, operating rooms, and patient recovery rooms. Wireless mobile computing has changed the nurse/patient administrative interface.
